

# VPI HIGHLIGHTS HAITI

Village Partners International

SPRING 2018

FOOD FOR HEALING

WATER FOR WELLNESS

MOBILE CLINIC

MOMBIN HOSPITAL STAFF

**VPI** works to better the lives of those in need living in and around Mombin Crochu, Haiti. Through a collaboration with the staff of Mombin Hospital, we are supporting programs that improve health and wellness. **FOOD FOR HEALING** provides daily meals for patients and family members while they are in the hospital. This helps to insure the consistent nutrition that is necessary for healing and recovery from illness. **WATER FOR WELLNESS** has provided funds to enable over 100 cisterns to be built, allowing thousands of people to have access to clean water. The **MOBILE CLINIC** brings health care providers to remote areas with no access to a clinic or hospital. Doctors and nurses travel by foot or ambulance twice a month bringing vaccinations and medicines to those in need. VPI currently supports a medical director, doctors, accountant, mechanic, and water project engineer at **MOMBIN HOSPITAL** in Mombin Crochu. We are also in the process of raising funds for a salaried ambulance driver so that health care can reach some of the most remote areas. All of these projects are having positive impacts and have resulted in many fewer cases of diseases, especially those related to lack of clean water.

**THERE IS MORE TO DO!!** VPI is working on a sustainable **NUTRITION PROGRAM** that will reach the most desperate children living in outlying areas and are not being served. Children dying from malnutrition is still a heartbreaking reality and we are dedicated to raising the funds needed to hire and train a nutrition specialist to implement and oversee this program.

**PLEASE HELP US** continue to help others by donating to VPI
